Projects

Personal Website *HTML, CSS*
A modern website featuring markdown/LaTeX notes for various courses completed at University of Waterloo.

Visual Studio Code LaTeX Extension *Javascript*
An extension for taking LaTeX notes in Visual Studio. Allows for custom macro definitions and auto-complete increasing overall note-taking speed.

Cliffed Ball *Python, Pygame*
A desktop game with a full user interface (settings, home page, game, store page) and ability to save game state.

VertiShot *Swift*
IOS app that enables users to take vertically or horizontally aligned photos using the phone's gyroscope. Intended for architectural photos and scanning documents using the camera.

Maze Backtracker *C++*
A command-line maze generator created to help visualize a recursive backtracking algorithm for maze generation.

Robotics Soccer Simulation *Python, Pygame*
Simulation environment for different artificial intelligence strategies to be tested against each other. Used by high school robotics team to develop and rank strategies to be used in competitions.

Mood Lift *HTML, CSS, JavaScript*
Hackathon project for helping track mental health in children. The web app consists of a simple daily quiz which stores the user's daily mood and offers long-term insights.
